PROFESSIONAL SUMMARY

Information Technology graduate with expertise in programming, networking, and cybersecurity. Skilled in troubleshooting, database management, and IT operations, with proven success in improving system efficiency and customer satisfaction. Seeking an entry-level role in IT to apply technical skills and contribute to secure, efficient solutions.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, Dart, JavaScript, PHP, HTML, CSS, SQL
- **Cybersecurity:** Vulnerability Assessment, CVE/CVSS, Nmap, OWASP, SIEM, Threat Detection, Incident Response, Risk Management, Security Auditing
- **Networking:** TCP/IP, LAN/WAN, VPN, Firewall, Network Protocols, Network Architecture, Network Models, Network Troubleshooting
- **Database Management:** PostgreSQL, SQL, Schema Design, Query Optimization, Backup/Restore Workflows
- **Mobile & Web Development:** Flutter (Android), Flask (Python), REST APIs, Postman
- **Operating Systems:** Linux (File Management, Shell Scripting, Permissions, Process Control), Windows Administration and Troubleshooting
- **Tools & Platforms:** Git/GitHub, Docker, Android Studio, Visual Studio Code, Figma, pgAdmin, DBeaver, Cisco Packet Tracer, WAMP/XAMPP, Postman
- **Productivity & Collaboration:** Microsoft 365 (Word, Excel, PowerPoint, Outlook, Teams, OneDrive, SharePoint), Google Workspace (Docs, Sheets, Slides, Drive, Gmail, Meet), Zoom, Discord

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Attention to Detail
- Team Collaboration & Leadership
- Organizational & Time Management
- Strong Verbal & Written Communication
- Ability to Work Effectively Under Pressure

EDUCATION

Bachelor of Science (Hons) in Information Technology

The Future University, Sudan | 2020 – 2025

- Classification: Second-Upper Class
- CGPA: 3.03 / 4.00
- Faculty of Information Technology

PROJECTS

Network Vulnerability Scanner (NVS) -- Graduation Project | The Future University, Sudan | Nov 2025

Tech Stack: Flutter, Python, Flask, PostgreSQL, python-nmap, CVSSLib, SQLAlchemy, Android

- Designed and developed a **Network Vulnerability Scanner (NVS)** application to automate detection of open ports and vulnerabilities.
- Integrated real-time CVE database lookups and applied CVSS metrics to score and prioritize risk severity for each detected vulnerability.

- Built AI-powered remediation guidance that analyzes findings and recommends prioritized preventive actions for administrators.
- Engineered a Python/Flask backend with PostgreSQL data storage, using SQLAlchemy ORM for structured management of scan sessions, ports, vulnerabilities, and remediation records.
- Developed a cross-platform Flutter (Android) frontend with scan configuration, live progress tracking, and PDF report export.
- Implemented three scan types (TCP, UDP, SYN) via Nmap integration and designed relational database schema (5 tables: Scans, Ports, Vulnerabilities, Remediation, ScanVulnerabilities).
- Applied Agile/Scrum methodology with bi-weekly sprints; conducted Alpha and Beta testing with the university ICT team and student volunteers.
- Adapted global cybersecurity standards (CVE/CVSS) to Sudan's unique network infrastructure, delivering a cost-efficient, localized security tool.

Personal Portfolio Website

Tech Stack: HTML, CSS, JavaScript (Vanilla)

- Designed and built a responsive, interactive personal portfolio website showcasing projects, skills, certifications, and experience.
- Implemented animated UI elements, a multi-section single-page layout, and a certificate viewer with modal interactions -- all without external JavaScript frameworks.
- Features include: scroll-based progress bar, mobile-responsive sidebar navigation, canvas-based animated background, and a dynamic certification gallery with PDF download links.

PROFESSIONAL EXPERIENCE

Software Operation Engineer | Jan 2024 – Mar 2025

- Managed software updates and installations for customer phones and PCs, completing **100+ successful installations** during the role
- Increased customer satisfaction by **30%**, measured through repeat service requests and positive feedback.
- Delivered technical troubleshooting and user guidance, resolving **90% of issues on first contact**.
- Reduced average device update time by 15 minutes per device through optimized workflows.

Media Store Assistant | Mar 2025 – Feb 2026

- Assisted **50+ customers weekly** by transferring movies and series from PC systems to smartphones, USB flash drives, and external hard disks.
- Resolved device compatibility and playback issues with a **95% success rate**, ensuring smooth customer experience.
- Maintained organized digital libraries, reducing transfer errors by **20%**.
- Delivered consistent, high-quality customer service earning positive recurring feedback.

CERTIFICATIONS & COURSE

- **Critical Thinking – The Future University's ICDR (2022)**
- **Graphic Design – Lantern Training Agency (2024)**
- **Foundations of Cybersecurity– Google/Coursera (2026)**
- **Play It Safe: Manage Security Risks– Google/Coursera (2026)**
- **Connect and Protect: Networks and Network Security– Google/Coursera (2026)**
- **Tools of the Trade: Linux and SQL – Google/Coursera (2026)**

LANGUAGES

- Arabic – Native
- English – Very Good (Professional Working Proficiency)
